# About me -

I am a passionate research engineer, always seeking to learn something new. I am interested in designing smarter systems for advancement of humanity

# Skills — Deep Learning

Deep Neural Network Convolutional Neural Network Reinforcement Learning Proficient in Tensorflow & KERAS with Python Proficient in Python, numpy, pandas, sklearn

# Machine Learning

Linear and Logistic Regression Decision Tree, CART, Gradient Boosting SVM,Naive Bias, KNN

# Robotics:

Computer Vision Algorithms (OpenCV)
Basic Robot Operating System (ROS)

### Data Structure and Algorithms

Graph Search Algorithms
Sorting, Search and Tree based Algorithms

#### Embedded System Design

#### AVR Microcontroller (C++), Basic ARM

#### [Experience]

Artificial Intelligence Engineer
Hiperdyne Corporation
www.hiperdyne.com( July, 2019- Till Present)

» Valve Position Controlling by observing sensor values for Oil Refinery Plant using reinforcement learning algorithms. The system was deployed to real industry and performed better than human expert.

» AI based Scoring System for optimal oil shipping route planning using Inventory data and Ship Schedules.

» Oil Refinery "After Burn" phenomenon level prediction from Sensor Values using Deep Learning based techniques, for taking early measures to benefit production.

» Oil Refinery Performance Evaluation. The system reduce dimension of high dimensional sensor data to visualize of latent low dimensional space of interest.

Jr. Research Engineer (Product development and Research Dept.)
Pi Labs Bangladesh Ltd.

www.pilabsbd.com( August, 2017- September, 2018)

»Programmable Syringe Infusion Pump Development (AVR)
»IOT Based Security and Monitoring System Development (Raspberry Pi, ESP8266)
»Battery Health Monitoring System Development (AVR)

#### Mars Rover Challenge

2016 Participated along with my team, Interplaneter in University Rover challenge, 2016 at Utah, USA. Our team attained 5th position in Phobos final. I was in charge of Robotic Arm Design and deployment. The Competition is organized by Mars Society, USA anually for college students world wide. URC 2016 Result, Critical Design Review YouTube

#### Machine Learning Project

2020	Machine Learning Algorithms implementation from Scratch (DNN,
2020	SVM , CART, Logistic Regression, Naive Bias, KNN) GitHub link Reinforcement Learning Algorithms from Scratch (DQN, DDPG, A2C,
	PPO) GitHub link
2019	YOLÓ, U-Net, FlowNet with Tensorflow-Keras GitHub link
2019	Kaggle Competition : House Price Prediction GitHub link

# Robotics Project

2019	Implementing MPC, ILQR Algorithms from Scratch GitHub link
2018	Designed a simple two link Robot using URDF and written driver codes
	for ROS in Python. YouTube link
2017	Desktop CNC Machine using AVR Platform. YouTube link
2014	Visually instructed Robotic arm in AVR Platform. YouTube link 1 and
	link 2

#### Education

2017	B.Sc. in Mechanical Engineering
	Bangladesh University of Engineering and Technology (BUET) CGPA: 3.23 out of 4.00
2011	<b>HSC (Science)</b> Rajuk Uttara Model College, Uttara, Dhaka 1207

GPA: 5.00 out of 5.00
SSC (Science)

2009 SSC (Science)
Rajuk Uttara Model College, Uttara, Dhaka 1207

GPA: 5.00 out of 5.00

Proficient in Python Working Experience in C++

#### Design Software

Proteus for Circuit Design SolidWorks for CAD Design

#### Language

English: Business level proficiency in English

Japanese: Passed NAT-N5

# **Academic Project**

A Remote control Surveillance robot. (Undergrad Project)

2016 Fusion of GPS and IMU data for precision velocity measure-

ment(Undergrad Thesis)

#### Co-Curricular activities

Founding President at BUET ROBOTICS SOCIETY (BRS)
 Co-organized Annual Robotics Competition for BRS

#### **Publications**

2016	Development of a two wheeled self balancing robot with speech
	recognition and navigation algorithm, Journal: AIP Conference Pro-
	ceedings

2019 Integrating data mining and microsimulation modelling to reduce traffic congestion: A case study of signalized intersections in Dhaka, Bangladesh Journal: Urban Science

2021 My most recent research work as main author on Visual Odometry and Auxiliary Task guidance is under review for a renowned conference.
